1
Recommendations, catalog-matched

A readiness score of 75

Readiness gates report generation. It is a weighted score across employee coverage, department spread, pattern confidence, and multimodal evidence.

Acme Corporation's composite score reflects the depth of discovery completed so far. Gaps in any weighted component are the fastest route to a stronger next version.

Exhibit 1 · Readiness breakdown

Weighted across employees, departments, patterns, and multimodal evidence.

Insights captured		30
Pattern confidence		0
Employee coverage		100
Department spread		100
Multimodal evidence		100

Req

Who took part

3 of 4 invited employees completed the discovery interview, a 75% completion rate.

Participation underpins readiness. Broader department coverage and completed interviews produce a clearer, more actionable picture of how work really happens.

05 & 06 — SIGNALS AND PATTERNS

What the interviews revealed

Signals are recurring pain points drawn directly from employee interviews. Patterns are the themes that connect them across departments.

5 signals surfaced from discovery interviews.

0 cross-team patterns identified.

Recurring pain points

PROCESS

Manual data entry and spreadsheets

STRENGTH 0.80

50 supporting evidence items across interviews and media.

Status updates to customers — we copy-paste from three different systems.

TOOLING

Core system dependency

STRENGTH 0.48

34 supporting evidence items across interviews and media.

Manager sign-off waits 2-3 days. We re-enter data into SAP after approval.

PEOPLE

Coordination overhead

STRENGTH 0.43

30 supporting evidence items across interviews and media.

Mostly manual PDFs and email — slow and tedious for everyone involved.

PROCESS

Repetitive time-consuming work

STRENGTH 0.40

25 supporting evidence items across interviews and media.

Mostly manual PDFs and email — slow and tedious for everyone involved.

No major changes since previous report

How we measured

Findings draw on structured discovery interviews conducted over WhatsApp and web chat for Acme Corporation. 3 of 4 invited employees completed the full discovery flow. Signals, patterns, and recommendations are derived from interview evidence and supporting media, then reviewed before client delivery.

Readiness weighting

Employee coverage (30%), department spread (30%), pattern confidence (25%), multimodal evidence (15%).

Review

When reviewers are assigned, overall notes and section comments are merged into an appendix at platform approval. Live discussions and WhatsApp follow-up threads are collaboration tooling and are intentionally excluded from this deliverable.
