

GulfLink Logistics LLC - Freight Billing SOP (Dubai)

Purpose: Invoice shippers and collect freight revenue in AED.

Workflow: TMS rate pull -> Excel reconciliation -> SAP billing document.

Manual spreadsheet used when TMS rates differ from contract PDFs.

Approval bottlenecks: Finance Controller must sign off exceptions > AED 2,000.

Data silos: warehouse cost sheet not linked to freight invoice lines.

POD scans arrive by WhatsApp and are retyped into SharePoint.

Month-end close waits on customs clearance notes and carrier credit notes.

Tools: SAP, Excel, SharePoint, TMS. Friction: repetitive copy-paste.
